DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: in the specification

On page 1, line 2, insert --DESCRIPTION--.

On page 1, line 4, insert --BACKGROUND OF THE INVENTION--.

On page 3, line 10, insert --SUMMARY--.

On page 5, line 8, --insert --BRIEF DESCRIPTION OF THE DRAWING--.

On page 6, line 4, insert --DETAILED DESCRIPTION OF THE INVENTION--.

Drawings

2. The drawings filed on 07/17/2006 are acceptable subject to correction of the informalities: Figure 1 & 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

Allowable Subject Matter

3. Claims 12-23 are allowed (Claims 1-11 are canceled by the Applicant).
4. The following is an examiner's statement of reasons for allowance:

Art Unit: 2821

The primary reason for the allowance of claims 12-18 is the inclusion of the limitation of a recess formed in the plate and extending radially towards a peripheral edge of the plate from a thinnest point of the plate such that a thickness of the plate increases radially from the thinnest point in proportion to

$$\frac{1}{\sqrt{1-(\epsilon_R + a/r^2)^{-1}}}$$

wherein r is a radial distance from the thinnest point; wherein ϵ_R is the dielectric constant of the plate material; and wherein a is a positive constant. It is this limitation found in each of the claims, as it is claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 19-23 is the inclusion of the limitations of a cladding plate configured to intersect a beam emitted by the microwave antenna, the cladding plate having a thickness d that increases with a distance r from a thinnest point of the cladding plate; and the microwave antenna being located at a distance from the cladding plate, the distance being measured along a surface normal from the thinnest point of the cladding plate. It is these limitations found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2821

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
